

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A security device of a power receptacle comprising:
 - a slot cover being a cover installed on a receptacle;
 - a surface of the slot cover being installed with at least one power slot set;
 - a surface of the power slot set having at least two recesses penetrating to an interior of the receptacle;
 - at least one recess in an inner surface of the slot cover being installed with [[a]] at least one positioning block at a lateral side thereof;
 - a protection cover ~~servicing~~ configured for isolating ~~the sheets~~ contacts of slots ~~the slot set~~ of the slot cover;
 - a surface ~~thereof~~ of the protective cover being formed with a plurality of ~~via~~ holes, at least one of the holes corresponding to a slot of the ~~slots~~ slot set;
 - an inner surface ~~thereof~~ of the protection cover being formed with [[a]] the plurality of ~~slots~~ holes of the protective cover and a plurality of hooking arms; the plurality of holes of the protection cover corresponding to [[a]] the plurality of hooking ~~sheets~~ arms and corresponding to the recesses of the protection cover;
 - at least one of the hooking ~~sheet~~ arms being installed with the fixing block at a lateral side thereof;
 - ~~a plurality of elastic elements installed between the positioning blocks of the slot cover and the fixing blocks of the hooking sheets; thereby, the protection cover can isolate the elements of the slots; thereby,~~
 - the hooking ~~sheets~~ arms at the inner surface of the protection cover are inserted

into the recesses of the slot cover;

the recesses of the slot cover can not be guided to move linearly;

[[the]] a plurality of elastic elements are installed between each of the positioning blocks of the slot cover and a corresponding one of the fixing blocks of the hooking ~~sheets~~ arms;

the elastic elements resist against the protection cover;

as a result, the protection cover will seal the ~~slots~~ slot set moreover. after moving the protection cover, the ~~via~~ holes of the protection cover will align to the ~~slots~~ slot set of the slot cover.

2. (Original) The security device of a power receptacle as claimed in claim 1, wherein the receptacle is selected from [[one]] the group consisting of a wall receptacle and an extension line receptacle.

3. (Currently Amended) The security device of a power receptacle as claimed in claim 1, wherein the slots of the slot cover include at least one ~~live~~ live wire slot, one ground wire slot and one grounding slot.

4. (Original) The security device of a power receptacle as claimed in claim 1, wherein the slot cover has three recesses; at least two recesses have respective fixing blocks at lateral sides thereof.

5. (Original) The security device of a power receptacle as claimed in claim 1, wherein the positioning block of the slot cover has a U shape and an interior thereof has a post.

Serial No.: 10/611,974
Group Art Unit: 2833
Examiner: James R. HARVEY

6. (Original) The security device of a power receptacle as claimed in claim 1, wherein the positioning block at the lateral side of the hook of the protection cover has a post.

7. (Currently Amended) The security device of a power receptacle as claimed in claim 1, wherein the elastic element is a helical compressible spring and two ends of the elastic element ~~is~~ are positioned between the positioning block and the fixing block.
